From the Molecule to the Cell I

Course overview

Universidad de Navarra | FACULTAD DE MEDICINA

Course 2026-2027

Faculty

Welcome!

Ruben Pio
Course Director - Biochemistry

Alberto Perez-Mediavilla
Biochemistry

Alfonso Calvo
Cell Biology

Beatriz Tavira
Cell Biology

Diego Serrano
Cell Biology

Javier Novo
Genetics

Matias Avila
Biochemistry

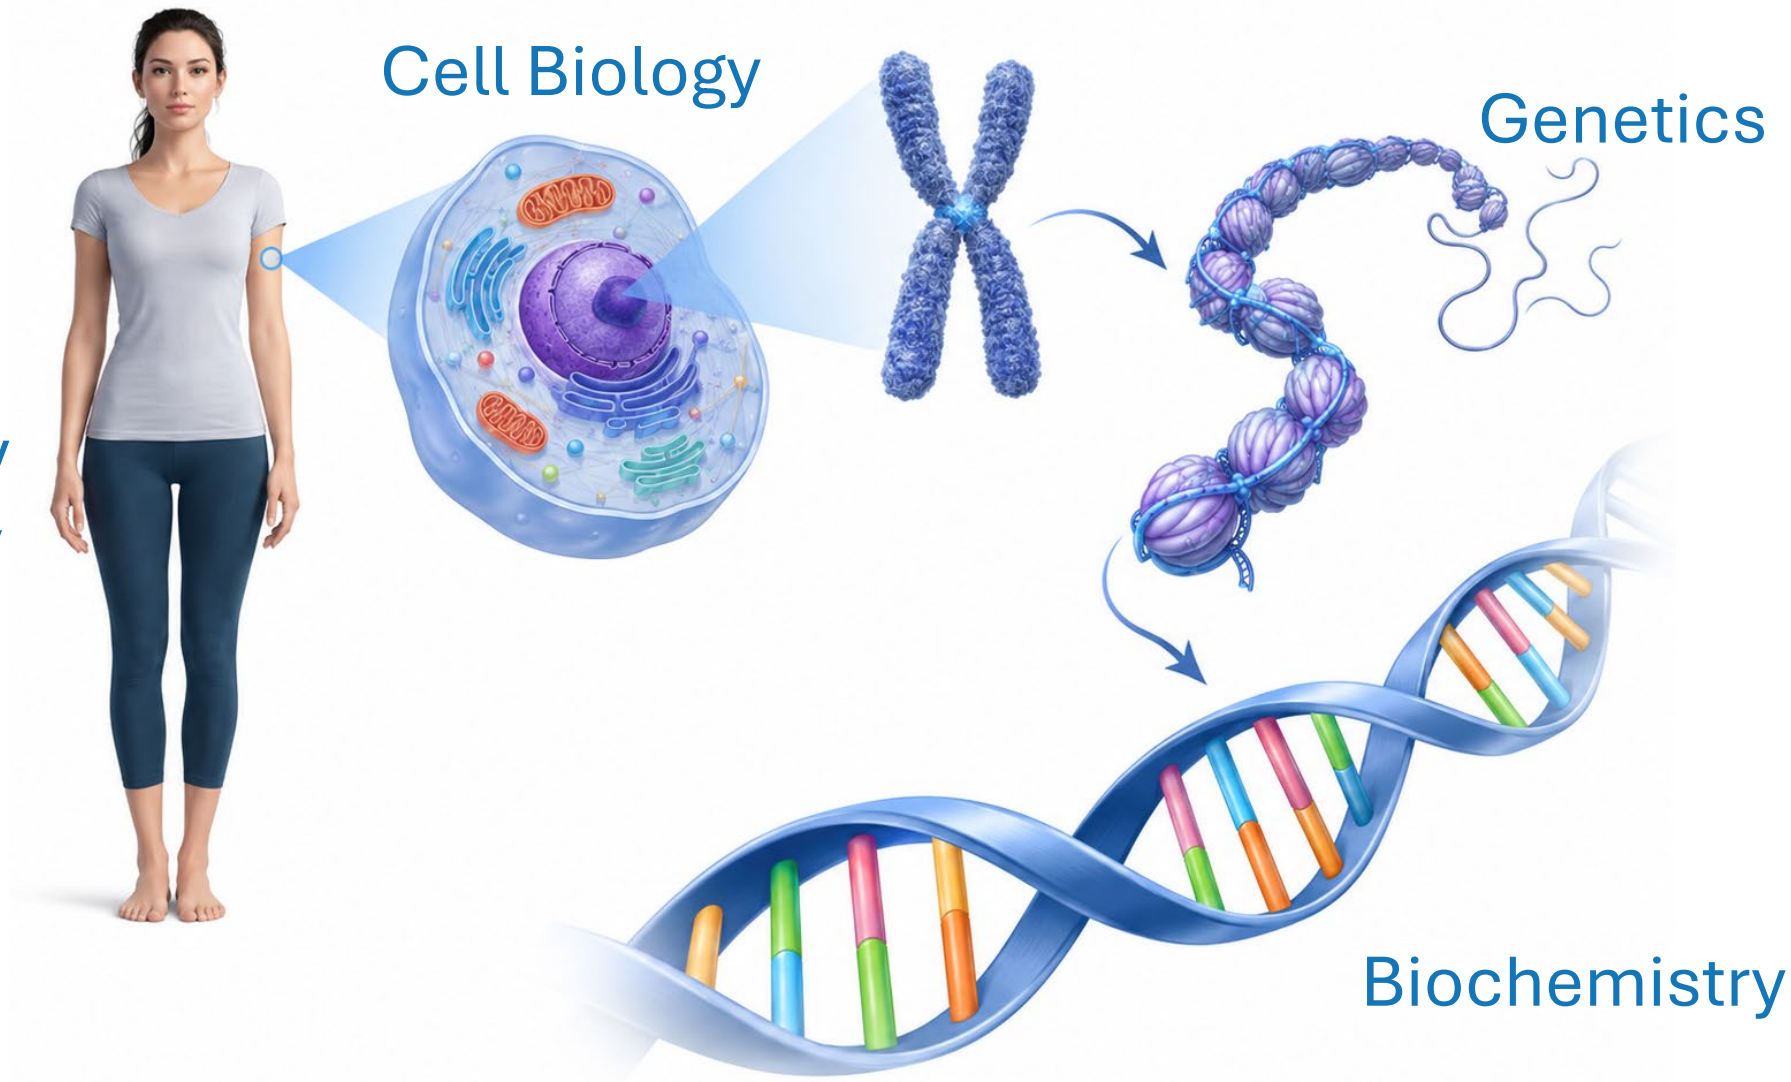

Nerea Varo
Laboratory Medicine

Silve Vicent
Cell Biology

Life is defined by its chemistry

Program

The course moves from molecular mechanisms to cellular architecture and functions

1 Cell structure and organelles

2 Biomolecules

3 Membrane and cell interactions

4 Cell signaling and receptors

5 Metabolism

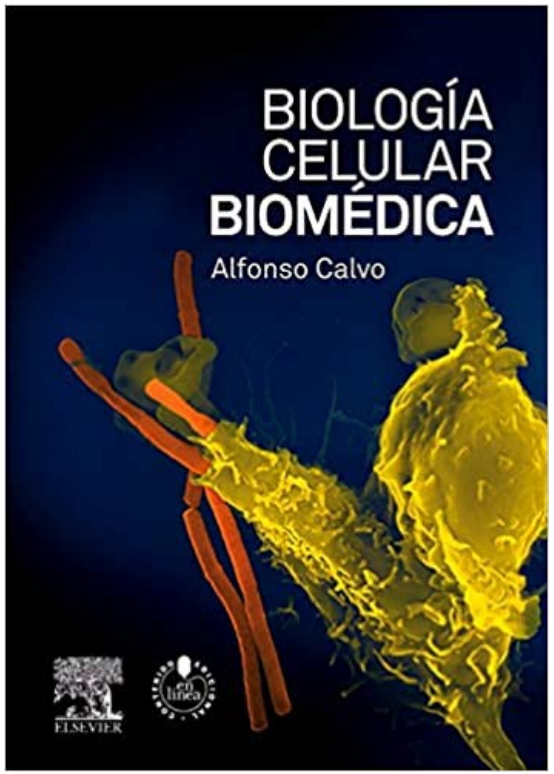

6 Laboratory medicine

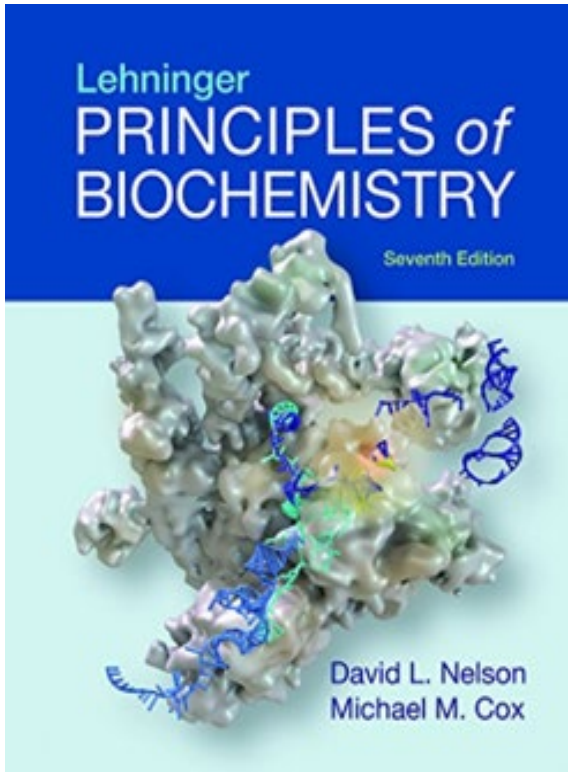

7 Cell cycle

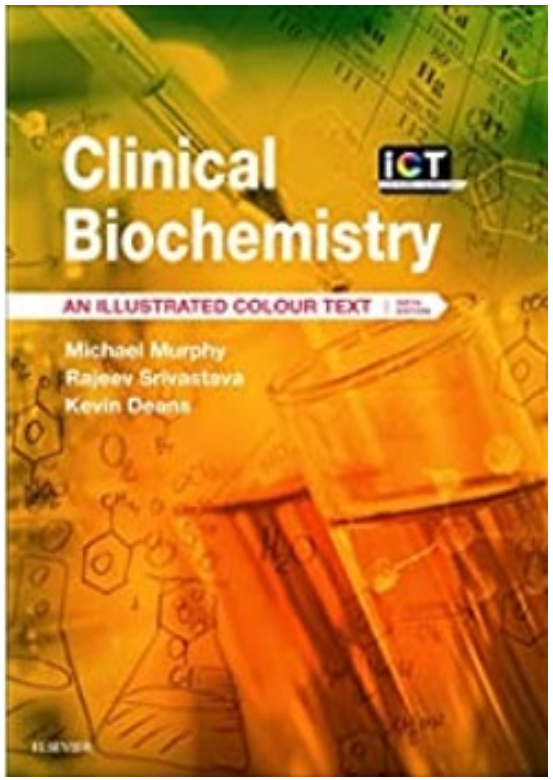

8 From DNA to protein

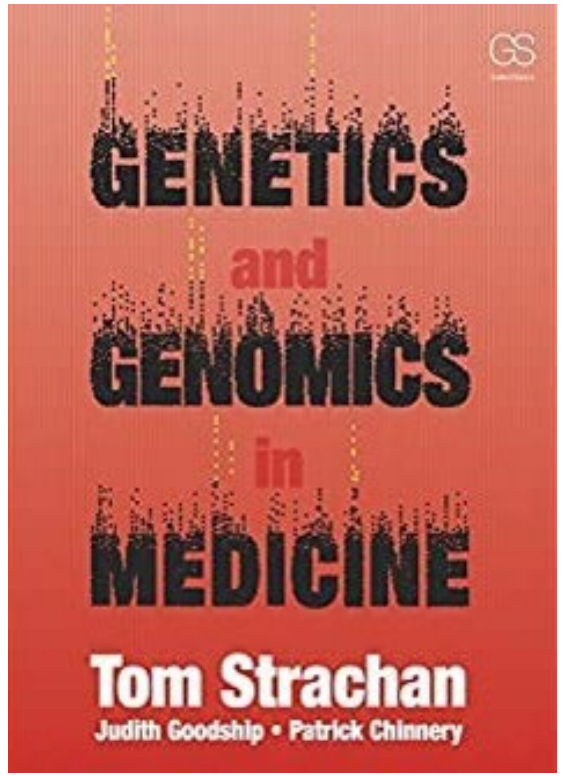

9 Genetics and genome-related diseases

Textbooks

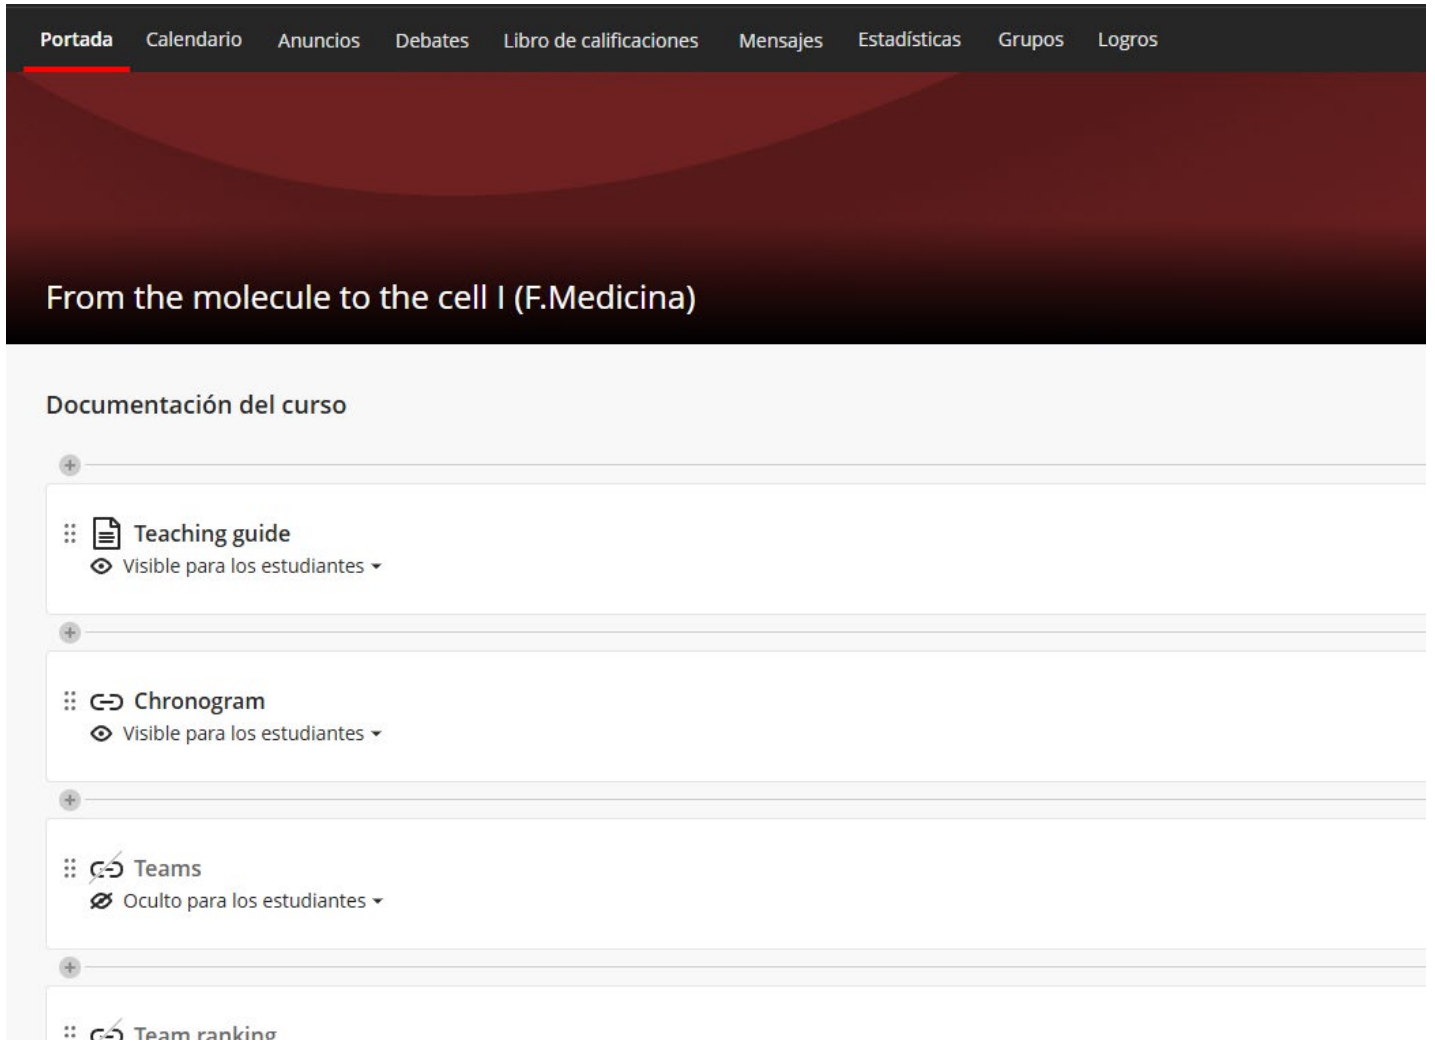

Recommended references for consultation
There is no single compulsory textbook
Follow the instructions and recommendations of the professors

Aula Virtual

The course site centralizes teaching guide, chronogram, teams, rankings, tests, announcements, and messages

https://aula-virtual.unav.edu/ultra/courses

Use it regularly
This is where course updates will appear

Can you access Aula Virtual?

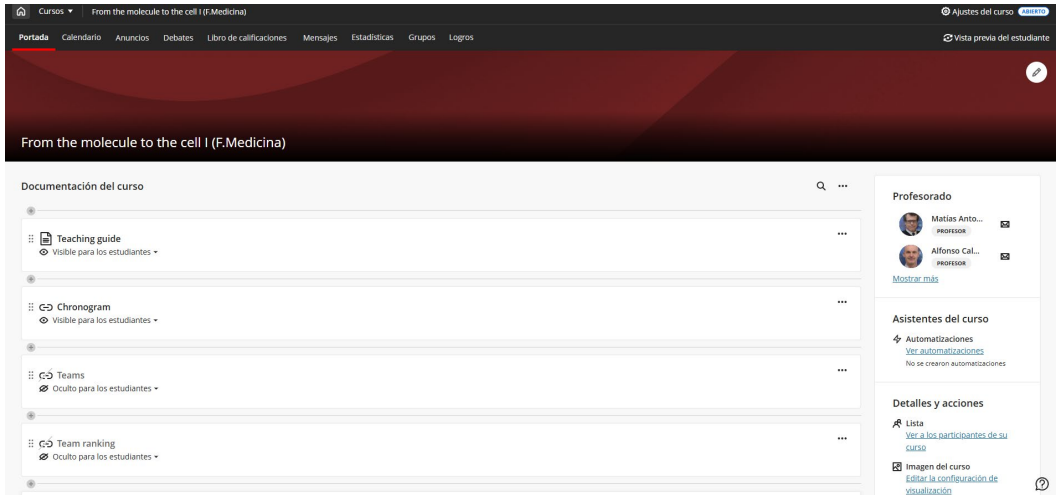

Please check it now

1 — Log in to Aula Virtual

2 — Open From the Molecule to the Cell I

3 — Check that you can see the course materials

4 — **If you cannot access the course, let us know**

Aula Virtual is our main communication platform throughout the course

Brief description of the course

Degree	Medicine
Module	1: Morphology, structure and function of the human body
Course type	Basic
ECTS	12
Language	English
Teaching period	September 1 – November 3

Methodology

72 h **Lectures**
Core concepts and integrated explanations
Flipped classroom methodology

42 h **Active learning**
21 team-based learning sessions (40 h)
2 workshops (2 h)

2 h **Self-assessment tests**
Formative, not graded

3 h **Tutorial sessions**
Course support and questions

Assessment

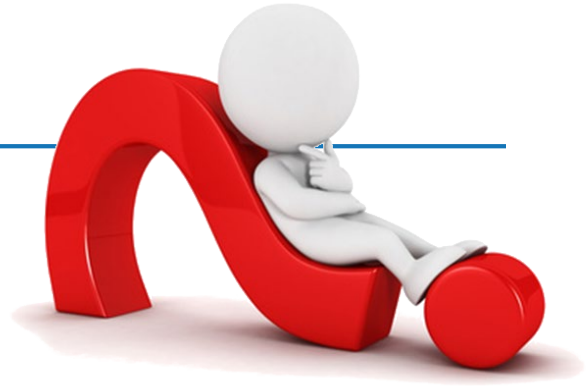

Three components contribute to the final grade

20%	50%	30%
Continuous assessment	**Final theory exam**	**Final practical exam**

To pass the course, students must:

- Attend at least **80%** of the active learning activities
- Pass **both** final exams

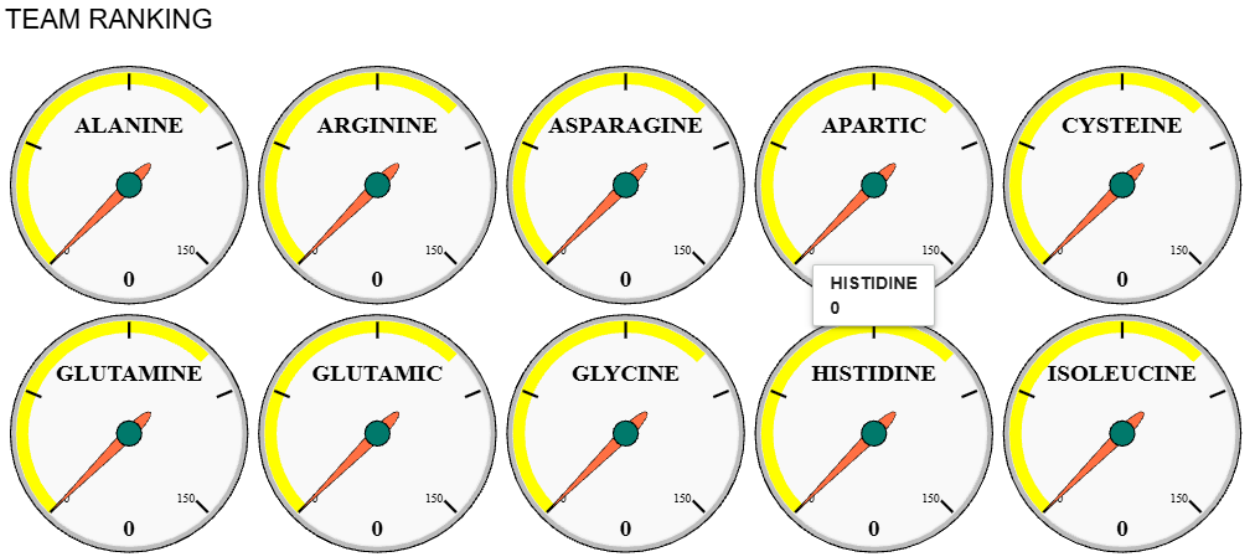

Continuous assessment

- It reflex the regular work during the course
- Activities that may contribute to the continuous assessment grade:
  - Homework exercises
  - In-class tests

    On line: Aula Virtual, Wooclap
  - Participation in class

Individual and team-based

Final exams

Ordinary examination period	November 9 – Theory (multiple-choice test) November 10 – Practical
Extraordinary examination period	June 1 – Both theory and practical

What do we expect from you?

Professional behavior

- Attend the sessions
- Show respect for your professors and classmates
- Keep up with the course

Learning habits

- Use Aula Virtual regularly
- Complete the homework
- Prepare for TBL sessions

Participate and ask questions!

The Most Complex Language in the World
